

Have you ever wanted to discover the beauty of Latin, but feared the time that you might need to invest, not to mention the money, to learn it? Biblia Sacra offers lay students an easy-to-follow alternative to expensive online and print Latin language programs. Scott Bayer, PhD, and Elisabeth Furbush, PhD, have prepared a self-study program based on the Latin Vulgate of St. Jerome. This accessible self-study, self-paced approach makes learning Latin easy for anyone with an MP3 player, the corresponding workbook, and a cup of morning coffee.

As I began the self-study program, I quickly came to find the sacred sounds and images that correspond to the text to be a beautiful addition to the program. Coupling this with audio files found on the accompanying CD that correspond to each lesson, I was quickly on my way to learning the basics of Latin. As someone who works full-time while also going to graduate school, I found this home study course to be convenient, but also comprehensive. Because the course allows the student to build progressively upon earlier content, it allows the user's knowledge of Latin to grow in a way that soon enough the student is reading through full passages of the Latin Vulgate!

Biblia Sacra is a great alternative to costly Latin language software or courses for adult students, but also for parents seeking to expose their children to the beauty of Latin. The format of the course appeals to students of all learning styles, in that it uses imagery, text, and audio to enhance the learning experience

So whether you're an adult seeking a deeper connection with scripture through a reading of the Latin Vulgate or just interested in exploring the intricacies of a beautiful language, Biblia Sacra should be exactly what you've been looking for.
